Dear FCC:

As a listener from a mountainous rural state, I have been very pleased to even receive quality radio broadcasts from any source. Satellite Radio allows me to choose what I want to hear and I can utilize it in areas that I normally cannot receive any radio transmissions. i would be very disappointed if satellite radio was limited in any way its ability to broadcast. I would feel that this would limit my listening choices.

Please do not allow lobbyists from big Radio to stop what I feel is a wonderful service.
